EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor of Technology in Computer Science and Engineering

Coimbatore, India

2024 – 2028

EXPERIENCE

Software Development Intern

IMIK Technologies

Apr. 2026 – May 2026

India

- Developed and maintained backend functionality using **Laravel/PHP** and **Python**, implementing application logic, database operations, and REST API workflows.
- Built and integrated an **AI chatbot in Python** for conversational interactions, working with backend logic and AI-powered response generation.
- Worked with **AWS** infrastructure to deploy, configure, and support cloud-hosted application components and backend services.
- Debugged and enhanced existing application features across backend services, APIs, databases, and deployment workflows within an existing production codebase.
- Collaborated with the development team to understand requirements, implement features, troubleshoot issues, and integrate new functionality into existing systems.

PROJECTS

jamr.io | *Next.js, TypeScript, FastAPI, PostgreSQL, Redis, WebSockets*

2025 – Present

- Built a real-time music matchmaking platform that connects users into shared **Spotify Jam rooms** based on listening preferences.
- Designed a full-stack architecture with a **Next.js/TypeScript** frontend and **FastAPI** backend backed by PostgreSQL for persistent application data.
- Implemented real-time room communication using **WebSockets/Socket.IO** and used **Redis** for caching and transient real-time state.
- Integrated the **Spotify Web API** to retrieve music data and connect user listening activity with matchmaking and room functionality.

GitHub Repository Analyzer | *Python, GitHub API, Static Analysis*

2026 – Present

- Built an automated code-analysis tool that accepts a **GitHub repository**, retrieves its source code, and evaluates project structure, implementation quality, and engineering practices.
- Developed a repository ingestion pipeline in **Python** to clone and inspect codebases programmatically across multiple project structures and languages.
- Implemented automated checks for code organization, project configuration, dependencies, documentation, and common engineering practices to generate structured evaluations.
- Designed the system to produce actionable feedback from repository analysis, turning raw source code into a structured assessment of project quality.

SneakerNet | *Next.js, TypeScript, FastAPI, PostgreSQL*

2026 – Present

- Developed a sneaker marketplace platform for discovering, tracking, and managing sneaker listings and resale data.
- Designed a modular full-stack architecture using **Next.js** and **TypeScript** for the frontend with **FastAPI** and PostgreSQL powering backend services and persistent data.
- Implemented REST APIs and relational data models for products, users, listings, and marketplace workflows.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, SQL, PHP

Frameworks: Next.js, React, FastAPI, Laravel, Node.js

Databases: PostgreSQL, MySQL, Redis

Cloud & DevOps: AWS, Docker, Git, GitHub, Linux, Nginx

Libraries & Technologies: NumPy, Pandas, Matplotlib, scikit-learn, REST APIs, WebSockets
